

Project Update: September 2015

We were on field work in remote areas for questionnaire survey near NNP.

Working environment was not such good especially because there were a lot of wild fires this dry season. Those conditions were the main cause of the delay of our work, now we have finished with questionnaire survey and we are working on data entry.

Within ten days, I will share the final database which will then be followed by final scientific and financial report.

Left: A poacher with killed animal was caught during our patrol with Park's guards. Right: Poacher caught by Forest Guards with snares and traditional weapon. Bottom Left: Poachers cooking sites. Bottom Right: Skin of killed colobus.

QUESTIONNAIRE TO EX-POACHERS TO BE SELECTED RANDOMLY IN EACH SITE OF STUDY

Introduction

We are doing this research to learn about the impacts of stopping poaching activities in Nyungwe National Park on ex-poachers and target animals. The following questions will be voluntarily answered by ex-poachers. This questionnaire is totally anonymous. The answers to these questions will be compiled and presented as a summary to your community and to ORTPN in order to facilitate a sustainable management of NNP. There will be no penalties for any actions or inaction reported on your part. If you do not know the answer to a question, please just say "I do not know." Also, it is your choice to not answer certain questions if you do not feel comfortable doing so. Do you have any questions?
