

## Project Update: June 2017

During the previous months in 2016/17 we actively did promotion and education on turtle/tortoises at Montenegro. We had local community education and the promotion of conservation via school workshops at the municipalities of Niksic, Budva, Kotor, Tivat and Ulcinj. Also we held academic lectures at the Department for Biology at Faculty of Mathematics & Natural Sciences at the University of Montenegro at Podgorica.

New national TV promotion, and also we will do in next period.

With locals we discussed about all problems that this species faced with and showed them in which situations they can help.

During the period from May 2017 we had a lot of conversations with locals, shared leaflets and put up posters. We make also a booklet Zastita kornjača u Crnoj Gori/Conservation of turtles/tortoises at Montenegro. (<http://drustvoprirodnjakcg.weebly.com/datoteka.html>).

All activities are published at site of NGO Natural History Association of Montenegro
