

Project Update: October 2017

During the previous month we actively did promotion and education on turtle/tortoises of Montenegro and distribution of promotional material. We had local community education and the promotion of conservation via school workshop at Virpazar (Bar municipality). We have been at Open Science days 2017 (11th October) at University of Montenegro (Department of biology) where we bring Hermann's tortoise in terrarium, with food for her, all field equipment for field research for turtles/tortoises and promotional material to share. During that period every interested group of students, pupils have heard amazing story about, "Word of Turtles/ tortoises at Montenegro", how they can recognise species, how to help them, and about its life. Together with Montenegro dolphin project we were part of TV show, "Living with the sea" where we promote our publication and talk about problems that Turtles/Tortoises face <https://www.youtube.com/watch?v=4k34TOspgX4>

All activities are published at site of NGO Natural History Association of Montenegro <http://drustvoprirodnjakacg.weebly.com/>
