

Project Update: January 2017

I take the opportunity to send a picture of species monitoring tray and the PDF of the book about the wild mammals of Quiçama National Park. The information presented in this book are from the local inhabitant's knowledge.

Note that we acknowledge the Rufford Foundation on p. 3 and put the logo on the last page of the book. The other logos are of the university (where I study) and of the Quiçama National Park, that is, they are not of the financier. We also put the Rufford logo on the species monitoring tray.
