

## Project Update: November 2018

### Butterfly Survey (Post- Monsoon): September-October 2018

- Butterfly survey of post-monsoon has been successfully completed as mentioned in the project time schedules.
- The data entry of both surveys is in process and the detailed checklists of butterfly of the study sites, with habitat preference, elevational distribution, abundance of the species will be submitted by the end of December 2018 in the final report.

### Conservation Awareness Programmes

- School conservation education programmes were successfully conducted.
- Butterfly watching programme was partially conducted because of less students number presence in school.
- Informal and formal meeting with local clubs and questionnaire survey with local peoples were partailly conducted because of their daily busy schedules in domestic livelihoods like herder, carpenter, hoteliers etc.
