

Project Update: July 2018

Thirty-eight young people from 10 communities/organisations participated in the 3R training conducted from 3 - 4 July 2018. During the training, they learned about types of waste, how long certain types of waste gone, the 3R concepts, how to make compost and animal feed from organic waste. Then they are facilitated to analyse the waste problem for waste and the assets present in their respective communities to solve waste problem. They also developed their action plans.
